

Cleanliness and Safety Procedures at OFC

We're taking extra precautions to keep you safe during your visit. With remote check-in options, enhanced cleaning and more, rest assured your wellness is our priority.

Masks and Temperature Checks

Masks and temperature checks are required for all members and employees throughout the facility. Members are required to wear a mask at all times, except during active exercise.

NanoSeptic Self-Cleaning Surfaces

High traffic touchpoints such as door handles are lined with nanoSeptic skins which are continuously self-cleaning. One of the components of the surface is a mineral nano-crystal which acts as a catalyst, charged by visible light. These nano-crystals create a continuous, powerful oxidation reaction. This oxidation reaction breaks down organic material into base components such as CO₂. The surface also forms free radicals which act as an additional cleaning agent.

No Contact Check-In

Activate your individual barcode on the FITT Lab App and scan your phone at the Welcome Desk to check-in when you arrive.

Hand Sanitizer and Wipe Stations

We have added several additional Hand Sanitizer and wipe stations throughout the club. We request that all members wipe off machines and equipment before and after use. Our antibacterial wipes contain 4 different powerful but safe disinfectants. Our hand sanitizer is a 64% alcohol foam that works instantly.

Socially-Distanced Spaces

All areas in the club have been modified to allow for social distancing. Floor placards are placed in group exercise studios and active machines are spaced appropriately. Members will also be socially distanced in pool areas. We have hired a Pool Monitor to assist with spacing.

Regular Cleaning and Sanitizing

We are conducting enhanced cleaning of regularly touched surfaces and common areas. Studios and exercise areas including the floors and equipment are cleaned between each break after class. The room is fogged with a powerful but safe disinfectant. The upstairs track is cleaned and vacuumed regularly. Exercise machines and equipment are cleaned before and after each use and our crew detail cleans each machine/piece of equipment daily as well. All other areas including bathrooms, locker rooms, sauna, and steam room, are detail cleaned twice daily.

Limited Capacities

Members are asked to reserve space at the club on our FITT Lab App. In doing this, our members are guaranteed a socially distanced spot of their choice in our gym. In addition, we have weight room and pool monitors whose entire job is to help members stay spaced 6 or more feet apart.
